

H.E.A.T INQUIRY CYCLE PLAN

INSTRUCTIONS:

Choose an improvement effort that you'd like to focus on, and design an inquiry cycle you can implement in a few weeks.

Hypothesize: If we... then... (Improvement Theory of Action)

Experiment: Specify how, when, and who will test the hypothesis.

Analyze: What data will you review, and what will certain findings tell you? (e.g. test scores, staff survey responses, attendance data, etc.)

Talk: Who will discuss the results and decide what to do next?
